*"A-Z Product Solutions for Trade and Industry"*

ORDER CODE: ATM-SDC1830

Our Subduct Coiler is designed to assist in the payoff, winding and storage of your PVC Subduct Coils up to a length of 660M

The "L" shaped upper sections are adjustable and removable which reduces storage space when not in use.

The unit is made from mild steel and is paint protected to offer moderate protection against rust. If you require galvanising to provide optimum rust protection please contact our sales office for a quote.

Loaded with a 660M Coil of 32mm Subduct

Top "L" sections adjustable / removable.

The nett unit weight is approx. 12kg
