CLPSWI-60	250	60	25.4

Instructions - Changing the Fuse

1. Secure the main body by the flats and unscrew the fixed swivel head.
2. Loosen small grub screw located in swivelling head to release centre bolt. Unscrew the bolt and replace with selected break fuse. Touch tighten the breakaway fuse. **Do not overtighten as you may break the head off the fuse.**
3. Tighten small grub screw onto fuse in the swivelling end and screw head back onto body. The swivel is now ready to be used. **Take note of which fuse you have inserted by the colour coding on the head of the fuse.**
