”A-Z Product Solutions for Trade and Industry”

CODE: ATM-DTECT120

D-tect 120 features Spot Detection technology that can detect objects instantly when placed on a wall, panel or floor.

Since the Bosch D-tect 120 never needs calibration, you can focus on the job without worrying about accuracy.

Three modes – drywall, universal and concrete – make this the right detector for multiple jobs.

Universal mode sees through more material, it sees "anything in anything." This device offers sound and a light to show user when something is detected behind a wall, panel or under flooring.
