

SPLIT LOCK ROLLER GUIDES

Available to suit conduit ID's from 39mm through to 225mm these Split lock Roller Guides are ideal for heavier duty jobs when your cables are heavy/bulky etc. The full bearing roller makes it easier going for entry or exit from the conduit as well as protect the cable sheath from the conduit edge.

When inserted into the conduit opening you adjust the expansion screw to the required tension to make a snug fit inside the conduit. This will hold the split lock roller guide firmly in place whilst the cable is installed into or out of the conduit. The roller is offset to the conduit guide which provides you with different angle options.

Replacement full bearing alloy rollers to all sizes are available.

Code	Conduit Internal Diameter
SRG038	39mm - 46mm
SRG046	47mm - 55mm
SRG055	56mm - 66mm
SRG066	67mm - 80mm
SRG080	81mm - 95mm
SRG095	96mm - 115mm
SRG115	116mm - 140mm
SRG140	141mm - 180mm
**NEW SRG180	181mm - 225mm

Measure the conduit's internal diameter before making your selection as this product is inserted inside the conduit.
