**NEW IMPROVED DRUM ROLLER RAMP SET**

Our new and improved 1000kg capacity Cable Drum Ramp Set now features extras such as a stabilising bar to the rear of the unit that will greatly reduce the possibility of the ramp set yawing when your cable is being spooled out. This is especially handy when the cable drum is towards the end of the spool and is naturally lighter in weight.

Another added feature is the generous height of the new side vertical roller on each side. This helps act as a guide to the required spacing of the ramps to match your drum width as well as assisting the drums rotation on the lower rollers. The ramp set will accommodate drums from 600mm to 1800mm in diameter.

There are mounting holes in the base of the unit should you need to secure the ramp set to the floor or bed of your ute/truck.

The units fold down for easy handling and storage. Each ramp weighs 12kg. **PART NO. VAN-DRR1000**

**COLLAPSED FOR STORAGE**

**SIDE VIEW WITH 900MM DRUM**
